PROFESSIONAL SUMMARY

Technical AI Product Manager with 5+ years of experience modernizing fintech platforms using LLMs, agentic workflows, and structured AI orchestration and validation layers. Proven track record delivering measurable outcomes across AML/KYC compliance, digital banking, and enterprise AI platforms. Seeking senior PM roles in the UAE's fast-growing fintech and AI ecosystem.

EXPERIENCE

Solytics Partners — Berlin & Mumbai

Mar 2025 – Apr 2026

Technical AI Product Manager – Nimbus Platform Modernization

- ▶ Spearheaded modernization of the Nimbus fintech platform by replacing static rule-based modules with in-house LLM-powered agent-assisted capabilities, reducing manual compliance review effort by 45%.
- ▶ Built agentic validation layers (document extraction + confidence scoring + structured output checks), improving accuracy and reducing rework across AML/KYC workflows.
- ▶ Fine-tuned models for core banking workflows (KYC, credit reports, regulatory filings), increasing case precision and lowering false positives.
- ▶ Introduced OCR + LLM hybrid pipeline for large-volume document review; built agentic orchestration layer increasing UDF adoption by 65%.
- ▶ Led architecture reviews and AI demos directly supporting a €15M enterprise sales pipeline.

Ogilvy — Mumbai

Aug 2024 – Mar 2025

AI Product Manager

- ▶ Led "Sing it with Milka" AI-native campaign generating 54M+ unique AI music creations, resulting in 9% global revenue uplift for the brand.
- ▶ Authored user stories, acceptance criteria, and documentation supporting global product releases across multiple iterative delivery cycles.
- ▶ Reduced manual reporting effort by 35% through automation and structured data workflows.
- ▶ Partnered with Engineering and UX to design scalable analytics dashboards; led stakeholder discovery sessions defining platform requirements.

Schbang — Mumbai

Oct 2022 – Aug 2024

Technical Product Manager

- ▶ Owned and rebuilt AI-driven document workflows handling 50K+ KYC/AML documents monthly, achieving 70% reduction in manual operations.
- ▶ Designed conversational AI prototypes for BFSI clients; structured prompt pipelines and validation logic reduced hallucination rates.
- ▶ Implemented BPMN-aligned orchestration using n8n + Azure OCR + LLM pipelines, shortening processing cycles and improving transparency.
- ▶ Applied AI-driven personalization to digital banking journeys: +18% conversion uplift, 12% churn reduction; shifted apps (5M+ users) to weekly deployments, reducing TTM by 34%.

SEB Global Services — Riga

Jun 2019 – Oct 2021

Derivative Operations Specialist

- ▶ Automated 150+ reporting processes using structured Excel-based models, saving 40+ hours/month in operational workload.
- ▶ Optimized settlement workflows in compliance-heavy derivative environments, reducing error rates and improving processing time.

KEY STRENGTHS

AI Product Strategy

Full-cycle LLM platform modernization delivering €15M+ pipeline, 45% efficiency gains, 65% adoption uplift.

LLM & Agentic Architecture

Multi-agent orchestration, OCR + LLM pipelines, confidence scoring, human-in-the-loop validation for regulated environments.

Fintech & Compliance

Deep hands-on KYC/AML, GRC, US Mortgage, and credit systems expertise; compliance-aware AI for enterprise banking.

Data-Driven Ownership

Consistent delivery: 70% ops reduction, 54M+ AI interactions, 34% faster TTM for digital banking apps (5M+ users).

AI Evaluation & Reliability

Golden-dataset evaluation, LLM regression testing, model monitoring dashboards for safe production AI.

Cross-Functional Leadership

Engineering, UX, Sales and Compliance coordination across Berlin, Mumbai, and Riga; C-suite stakeholder management.

LANGUAGES

English · C2 (Proficient)

German · A1 (Basic)

EDUCATION

Riga Technical University

M.Sc. Business Informatics Sciences
Riga, Latvia

Riga Technical University

B.Sc. Engineering Economics & Statistics
Riga, Latvia · May 2022

AI PROJECTS

AI-native B2C Insurance App

- ▶ Spearheaded end-to-end product for an AI-first insurance wallet aligned to BIMA Sugam infrastructure; designed One-Tap Claim Kit reducing documentation friction.
- ▶ Built explainable policy cards using clause-grounded RAG + citation logic, enabling users to understand exclusions in plain language.
- ▶ Architected GROMO AI Agent (chat + voice) for claims, renewals, and network search with structured confirmation flows.
- ▶ KPIs: +60% perceived helpfulness, +25% improvement in complete claim submissions.

LLM Evaluator – Golden Dataset Evaluation Platform

- ▶ Built golden-dataset evaluation framework to benchmark LLM outputs against trusted reference answers.
- ▶ Implemented exact match, cosine similarity, and LLM-as-judge scoring for systematic regression detection before model deployment.
- ▶ Designed analytics dashboard to monitor model performance drift and confidence calibration over time.

Autonomous Lead Enrichment with Human-in-the-Loop Workflow

- ▶ Built n8n-based agentic workflow that enriched, scored, and generated outreach emails using GPT-5; human-in-the-loop review via Claude MCP prevented automated errors.
- ▶ Implemented automated Gmail draft creation and logging, ensuring audit trail and compliance.
- ▶ Enabled scalable review (40–80K leads), resulting in 70% faster lead closures for SMBs.

TECHNICAL SKILLS

Gen-AI & Agentic Systems

LLM Application Design, Agentic Workflows, Multi-Agent Orchestration, Function Calling, Context Engineering, RAG Pipelines, Memory & Session Management, Prompt Engineering, Model Fine-Tuning, AI Guardrails, LLMOps, AI Governance

AI Evaluation & Reliability

Golden Dataset Evaluation, LLM Regression Testing, Hallucination Detection, Confidence Scoring, Model Monitoring, AI Observability, Human-in-the-Loop Validation, Trace-based Observability

Data & Platforms

Python, SQL, ETL/ELT Pipelines, OCR + LLM Document Intelligence, REST APIs, Webhooks, Event-Driven Architectures, n8n Automation, Camunda BPMN

Cloud & Infrastructure

AWS (EC2, S3), Azure, GCP, CI/CD Pipelines, Production Deployment for AI Systems

Product & Analytics

AI Platform Strategy, Enterprise Roadmaps, Technical Product Ownership, Agile/Scrum, A/B Testing, Power BI, Looker, Google Analytics

Financial & Domain Tools

KYC/AML Workflows, GRC, US Mortgage & Credit Systems, Financial Operations Automation, Figma, Miro, Jira, Confluence, Notion, Cursor, Claude Code

CERTIFICATIONS

- Certified Business Process Analyst (CIBM, BPMN)
- Certified Scrum Product Owner (CSPO)
- LangChain for LLM Applications
- Vector Databases & RAG Pipelines
- MLOps Fundamentals – DeepLearning.AI
- Prompt Engineering for LLMs
- Microsoft Responsible AI (Foundations)
- AWS Cloud Practitioner (Foundational)
- Google Project Management
- Google Data Analytics
