PROFESSIONAL SUMMARY

Senior Technical AI Product Manager with 5+ years of experience owning agentic AI systems, LLM orchestration, and conversational AI at scale - delivering quality, safety, and measurable automation outcomes across enterprise platforms. Proven ability to shape agent reasoning frameworks, define validation and guardrail strategies, and partner cross-functionally to translate business processes into scalable, trustworthy AI-driven experiences.

EXPERIENCE

Solytics Partners Mar 2025 - Apr 2026

Berlin & Mumbai

- Spearheaded modernization of the Nimbus fintech platform by replacing static rule-based modules with in-house LLM-powered deterministic and agent-assisted capabilities, reducing manual compliance review effort by 45%.
- Built internal agentic validation layers (document extraction + confidence scoring + structured output checks), improving extraction accuracy and reducing rework cycles across AML/KYC workflows.
- Fine-tuned models for core banking workflows (KYC, credit reports, regulatory filings), increasing case precision and lowering false positives in compliance flags.
- Introduced OCR + LLM hybrid pipeline automating large-volume document review, enabling faster enterprise onboarding; built agentic orchestration layer increasing UDF adoption by 65%.
- Standardized third-party AML/KYC API integrations, reducing turnaround time by 25%; led architecture discussions and AI demos directly supporting a €15M enterprise sales pipeline.

Ogilvy Aug 2024 - Mar 2025

Mumbai

- Led "Sing it with Milka" AI-native campaign generating 54M+ unique AI music creations, resulting in 9% global revenue uplift for the brand.
- Authored user stories, acceptance criteria, and product documentation supporting global product releases across multiple iterative delivery cycles.
- Partnered with Engineering and UX teams to design scalable analytics dashboards and reporting workflows; reduced manual reporting effort by 35% through automation.
- Led discovery sessions with business stakeholders to define analytics platform requirements; supported Sales teams with product demonstrations and technical clarifications.

Schbang Oct 2022 - Aug 2024

Mumbai

- Owned and rebuilt AI-driven document workflows handling 50K+ KYC/AML documents monthly, achieving 70% reduction in manual operations.
- Designed conversational AI prototypes for BFSI clients; structured prompt pipelines and validation logic reduced hallucination rates and improved response reliability.
- Implemented BPMN-aligned orchestration using n8n + Azure OCR + LLM pipelines, shortening processing cycles and improving operational transparency.
- Applied AI-driven personalization to digital banking journeys: +18% conversion uplift, 12% churn reduction; shifted apps (5M+ users) to weekly deployments, reducing time-to-market by 34%.

SEB Global Services Jun 2019 - Oct 2021

Riga

- Automated 150+ reporting processes using structured Excel-based models, saving 40+ hours/month in operational workload.
- Optimized settlement workflows in compliance-heavy derivative environments, reducing error rates and improving processing time.
