Open to Lisbon (onsite) - relocation ready

PROFESSIONAL SUMMARY

AI Product Manager with 5+ years building user-facing, AI-powered products at consumer scale - from a 54M+ generation B2C AI-native campaign to a 5M+ user digital banking app personalization stack. Hands-on across LLM application design, NLP and recommendation systems, agentic workflows, and document intelligence (OCR + computer-vision-adjacent pipelines). Deeply collaborative with data scientists, ML engineers, design, and marketing - translating AI/ML complexity into intuitive user journeys, defining KPIs, running A/B experiments, and shipping ethical, privacy-aware AI features in regulated, high-stakes environments.

PROFESSIONAL EXPERIENCE

Solytics Partners - Berlin & Mumbai

March 2025 - February 2026

Technical AI Product Manager - Nimbus Platform Modernization

- Drove the AI product roadmap for Nimbus, replacing static rule-based modules with in-house LLM-powered, agent-assisted capabilities - delivering a **35% reduction in manual review effort** and lifting end-user accuracy.
- Partnered daily with data scientists and ML engineers to fine-tune domain models (KYC, credit reports, regulatory filings), increasing case precision and lowering false positives in production.
- Designed agentic validation layers (extraction + confidence scoring + structured output checks), introducing measurable reliability and human-in-the-loop guardrails for high-trust AI features.
- Shipped an OCR + LLM hybrid document-intelligence pipeline that automated large-volume review, cutting onboarding time for enterprise users.
- Defined KPIs and instrumentation (extraction accuracy, rework cycles, UDF adoption) - drove **+65% UDF adoption** through a modular agent orchestration layer.
- Standardized third-party AML/KYC API integrations, cutting integration turnaround by 25% and improving cross-team velocity.
- Led solution architecture and AI demos that supported a **\$15M enterprise sales pipeline**.

Ogilvy - Mumbai

Aug 2024 - March 2025

AI Product Manager

- Led the **"Sing it with Milka" AI-native consumer campaign** - generative-music product that produced **54M+ unique AI generations** for end users and delivered **+9% global revenue uplift** for the brand.
- Owned end-to-end product discovery with business, creative, and engineering stakeholders; translated ambiguous brand goals into shippable AI features and measurable success metrics.
- Authored user stories, acceptance criteria, and product documentation across multiple global releases; partnered with UX and engineering on scalable analytics and reporting workflows.
- Reduced manual reporting effort **35%** through automation and structured data workflows; supported sales and customer teams with product demos and technical clarifications.

Schbang - Mumbai

Oct 2022 - Aug 2024

Technical Product Manager

- Applied AI-driven personalization and **recommendation systems** to consumer digital banking journeys for a **5M+ user app**, delivering **+18% conversion uplift** and **12% churn reduction**.
- Shifted the same 5M+ user app from slow-release cycles to weekly deployments, cutting time-to-market by **34%** and unlocking continuous experimentation.
- Designed conversational AI prototypes for BFSI users; structured prompt pipelines and validation logic reduced hallucination rates and improved response reliability.
- Owned AI-driven document workflows handling **50K+ KYC/AML documents monthly**, achieving 70% reduction in manual operations.
- Implemented BPMN-aligned orchestration using n8n + Azure OCR + LLM pipelines, shortening processing cycles and improving operational transparency.

Derivative Operations Specialist

- Automated 150+ reporting processes using structured Excel-based models, saving 40+ hours per month in operational workload.
- Optimized settlement workflows in compliance-heavy derivative environments, reducing error rates and improving processing time.

AI PROJECTS

AI-native B2C Insurance App

- Spearheaded end-to-end product thinking for an **AI-first consumer insurance wallet** aligned to BIMA Sugam infrastructure - translating complex policy logic into a friendly, mobile-first user experience.
- Designed One-Tap Claim Kit and consent-scoped upload links, reducing claim friction and improving first-time-right submissions.
- Built explainable policy cards using clause-grounded **RAG + citation logic (NLP)**, letting users understand exclusions in plain language.
- Architected GROMO AI Agent (chat + voice) capable of executing claims, renewals, and network search with structured confirmation flows - privacy- and consent-aware by design.
- Defined and tracked user-impact KPIs: **+60% perceived helpfulness, +25% complete claim submissions**.

LLM Evaluator - Golden Dataset Evaluation Platform

- Built a golden-dataset evaluation framework to benchmark LLM outputs against trusted reference answers - used to gate model releases that reach end users.
- Implemented exact-match, cosine-similarity, and LLM-as-judge scoring for systematic regression detection; reduced ad-hoc testing and introduced repeatable pre-deployment cycles.
- Designed an analytics dashboard to monitor model performance drift and confidence calibration over time - closing the loop between data science and product.

Autonomous Lead Enrichment with Human-in-the-Loop Workflow

- Built an n8n-based agentic workflow that enriched, scored, and generated outreach using GPT-class models, with structured human-in-the-loop review (Claude MCP) preventing automated errors.
- Enabled scalable review of 40-80K leads with full audit trail and compliance, resulting in **70% faster lead closures** for SMBs.

SKILLS

AI Product & Strategy: AI Product Roadmaps, KPI Definition & Measurement, A/B Testing & Experimentation, Product Discovery, User Interviews, Customer Journey Mapping, Stakeholder Management, Cross-functional Leadership (Engineering, Design, Data Science, Marketing), Agile / Scrum, Ethical AI & Data Privacy.

Gen-AI & Agentic Systems: LLM Application Design, NLP, Recommendation Systems, Agentic Workflows, Multi-Agent Orchestration, Toolchain / Function Calling, Context Engineering, Retrieval Pipelines (RAG), Memory & Session Management, Prompt Engineering & Versioning, Domain-Specific Fine-Tuning, AI Guardrails & Safety, LLMOps, Model Versioning, AI Governance.

AI Evaluation & Reliability: Golden-Dataset Evaluation, LLM Regression Testing, Hallucination Detection, Confidence Scoring, Model Monitoring, AI Observability, Human-in-the-Loop Validation, Evaluation Framework Design, AI Telemetry, Trace-based Observability.

Data, Document Intelligence & Integrations: Python, SQL, ETL/ELT Pipelines, OCR & LLM Document Intelligence (computer-vision-adjacent), Structured Data Extraction, REST APIs, Webhooks, Event-Driven Architectures, Ontologies, Knowledge-Graph-Ready Data Models, n8n Automation, Camunda BPMN.

Cloud & Infrastructure: AWS (EC2, S3), Azure, GCP, CI/CD Pipelines, Environment & Release Management, Production Deployment for AI Systems.

Analytics & Tools: Power BI, Looker, Google Analytics, Figma, Framer, Miro, Jira, Confluence, Notion, Cursor, Claude Code, Model Risk Management.

EDUCATION

M.Sc. in Business Informatics Sciences - Riga Technical University

Riga, Latvia

B.Sc. in Engineering Economics & Statistics - Riga Technical University

Riga, Latvia · May 2022

CERTIFICATIONS

- Certified Business Process Analyst (CiBM, BPMN)
- Certified Scrum Product Owner (CSPO)
- Google Project Management
- Product Management - Coursera
- Process Engineering & Analytics
- Google Data Analytics
- LangChain for LLM Applications - Coursera
- Vector Databases & RAG Pipelines - LangChain
- Microsoft Responsible AI (Foundations)
- MLOps Fundamentals - DeepLearning.AI
- AWS Cloud Practitioner (Foundational)
